

AAMC 'Green Initiatives' to support our world

AAMC acknowledges that we – and all organizations – must take our environmental responsibilities seriously and provide sustainable solutions for future generations.

We are committed to minimizing our environmental footprint, encouraging and supporting initiatives from customers and employees alike to further reduce the impact our operation has on the environment.

Commencing 2009, AAMC Training Group plan to demonstrate our commitment to the environment by supporting Carbon Neutral with a pledge to plant a tree for each student undertaking one of our certified face-to-face or correspondence courses.

Trees absorb carbon dioxide while they grow as well as help combat salinity, reduce soil erosion, clean underground water systems and provide habitat for wildlife.

Other internal initiatives include:

- ☑ All our course manuals are printed on recycled paper
- ☑ Our internal waste (plastics, paper, etc.) is segregated and sent for recycling
- ☑ Using energy saving globes for our lighting
- ☑ Switching lights off in unoccupied areas of the building
- ☑ Offering the option of on-line courses to reduce paper usage
- ☑ Collection and recycling of all empty toner cartridges
- ☑ Regular discussions on environmental issues at all levels throughout the business to drive thought, leadership and enterprise-wise action plans.
